About this guide

This document lists the objects and files which must be considered while updating the Jeeves ERP patch to support the KSeF - Import of bank payment files.

Note

This functionality is delivered as hotfixes to the supported versions of Jeeves; along with information about the versions on the respective hotfix levels on which they are tested.

lrkd.trg

Changed window context(s):

wLrkd.wcd

Changed trigger(s) in TRG\.TRG:

lrkd.trg

Changed procedure(s) in (UTV)SPR\.SPR:

Jeeves_Upd_1527.spr

Error messages

Note that any new error messages are available in the language package.
You can download and apply the latest language package to display these messages in Jeeves ERP as follows:

1. After the complete installation of Jeeves application, navigate to the **Packages** folder in your Jeeves application folder. Both English (Lang_sw.JSP.zip) and Swedish (Lang_se.JSP.zip) language packages can be found here.
2. Launch **JeevesPackageManager.exe** and import these language packages into your database.
3. The default language needs to be set up for standard records at the company level in the Language (SprakKod) field in the System data, own company (sy1) program. Refer to Jeeves online documentation for Language codes.
