## *Error messages*

Note that new error messages are available in the language package.
You can download and apply the latest language package to display these messages in Jeeves ERP as follows:

1. After the complete installation of Jeeves application, navigate to the **Packages** folder in your Jeeves application folder. Both English (Lang_sw.JSP.zip) and Swedish (Lang_se.JSP.zip) language packages can be found here.
2. Launch **JeevesPackageManager.exe** and import these language packages into your database.
3. The default language needs to be set up for standard records at the company level in the Language (SprakKod) field in the System data, own company (sy1) program. Refer to Jeeves online documentation for Language codes.
