1 Tested platforms

1.1 Server-side software

Software	Version(s)
Operating system	Microsoft Windows server 2025 Microsoft Windows server 2022
Database server	Microsoft SQL server 2025 (CU 7)

1.2 Client platforms

Operating system	Jeeves client setup
Microsoft Windows 11 version 25H2 (Build: 26200.9168)	Jeeves Classic client, Desktop client ConnectionType=6 (Clients are connected through Client broker and directed to the server)

1.3 Third party integration software

Product version	Jeeves client setup	Operating system
.NET 3.5, 4.5.2, 4.6.2,4.8, Core 10.0	64-bit client	Windows 11
MS Office 365	64-bit client	Windows 11

1.4 Cloud Setup

Operating system	SQL server	Jeeves client setup
Windows Server 2022 Client Win 11 version 25H2 (Build: 26200.8457)	SQL Server 2025 (CU7)	Desktop client and DesignStudio, Upgrade installation of JAS 2024.0 to JAS 2026.2 Port=4502, Connectiontype=6, ClientBrokerMode=3 Login with Federated authentication enabled
Windows Server 2025 (SDM3) Client Win 11 version 25H2 (Build: 26200.9168)	SQL Server 2025 (CU7)	Desktop client and DesignStudio Login with Federated authentication only

1.5 Mobility Setup

Operating system	SQL server	Jeeves Mobile setup
iOS Version 26.2	SQL 2022 (CU 27)	1.54.1
Android Version 16	SQL 2022 (CU 27)	1.55

2 Test activities

The following types of tests have been made - functional tests, regression tests, and acceptance tests.

During functional testing, all the corrected errors that were approved for this release, and new features included in this release, were tested to ensure that these worked as expected.

During regression testing, application functionality was tested using Jeeves' standard processes defined in the user guides. Extended functionality tests were run within each module besides the user guide tests. All the new features that are included in Jeeves ERP 2026.Q2.2 and all errors with severity 1 and 2 corrected since last release were validated again in the regression test environment to ensure product quality. The purpose of the regression tests was to ensure that the standard processes/functionality passed.

During acceptance testing, application functionality was tested using end user workflows. The focus was to verify that the corrected errors detected during the regression tests passed and were working as intended. The objective of the acceptance tests was to approve the version to be delivered.

The test environments were based on the standard menu, template companies and role-based user interface. The setup also included normal users, users with single sign on and with the security manager activated to test the application.

2.1 Main test activities

2.1.1 Functional test for application

- **New enhancements**
- **Corrected error reports**

2.1.2 Regression test

- **Application**

  New installation
  Upgraded installations from (JAS version 2024.0, 2025.0 and 2026.0) to latest 2026.2
  Following is a list of tested business process flows, covering functionality across Jeeves modules based on Jeeves user guides:
  Production
  Sales
  Purchases
  Inventory
  ICT
  Service
  Product configurator
  General ledger
  Accounts receivables
  Accounts payables
  EDM
  WMS cloud printing support
  WMS smoke pass
  Split functionality in arrival
  Application and WMS unit test execution.
  EDI Order, Order Response, Delivery Plan, Order Change and Invoice response

Serial number was not set on stock ARSI record when processing credit order returns
Handling the Podmiot3 (3rd party) element for FA(3) file
Language handling in FA(3) file
Advance invoices: non-printable order rows excluded from FA(3) file
More details about the advance invoice(s) linked to the settlement invoice displayed in FA(3) file
Support KSeF information in Supplier payments outgoing and Import of bank payment files
Exploratory testing for all modules

- **Platform**

  Jeeves Outbound Service
  Jeeves Console and Identity Service
  Cloud Printing integration flow
  Backward Compatibility for SQL Tunnel Cloud Agent.
  Federated login for Desktop Client
  File Comparison and Digital Signature
  Exploratory testing related to focus.
  Desktop client - User defined connections tests.
  Security Manager – Basic test.
  Security Modes
  Package Manager.
  Communication Layer Test.
  Performance Testing - Latest Desktop Client
  EDM testing specific to S3.
  Design studio workflows using Jeeves Server running on IIS.
  Cloud report - Basic test (Query, procedure reports including params, Macro reports).
  Federated login for Design studio
  Digital Signature of dlls
  Design studio Smoke tests - Existing functionalities

- **Mobility**

  Federated Login for Mobility
  Mobile order workflow using IPAD and mobile device(Split screen and List window navigation tests)
  Online field service app flow
  Notification services
  Mobile apps simulate bad network scenarios

- **PEPPOL**

  Polish Ksef Outgoing Invoice along with outgoing PDF retrieval
  Polish Ksef Incoming Invoice
  Smoke Pass: Pagero integration service (Outgoing and Incoming invoices including Business Response)
  Smoke Pass: CreditFlow/OptoSwedenSender Outgoing invoices
  Message broker cloud agent backward compatibility test with previous supported Application versions (2024.0 and 2025.0)

- **e-Approval**
  eApproval cloud regression test including EDM
  eApproval PDF viewer test

- **Automation tests**
  e-Approval main workflows
  Desktop main workflows
  Mobility main workflows
  Finance API
  Sales API
  Jeeves API
  Peppol flow
  Online Doc UI

2.1.3 Acceptance test

Environment setup
Upgraded installation from (JAS 2025.0,2024.0) to latest 2026.2
End user workflow – Classic and Desktop clients
Bug revalidation- Application
Bug revalidation- Platform
File comparison, digital signature
Translation test - 8 supported languages
Correction of errors found during regression test
